

# Project Proposal: E-Commerce Website Development

**Business owner Name:** Shahid Mohammad

**Ph No.** +91- 8825041655

**Email:** [Shahidmohd533@gmail.com](mailto:Shahidmohd533@gmail.com)

**Address:** Srinagar, Jammu & Kashmir-India

**Date:** December 28, 2025

---

## Project Overview

- Premium, **fully responsive eCommerce website** with luxury, heritage-inspired UI/UX
- **Mobile-first design** optimized for speed, performance, and SEO
- Structured navigation with **Shop, Categories, Tracking, Our Story,**
- **Category-based product listings** (Spices, Honey, Tea, Dry Fruits, Cereals, Oils, Pickles, etc.)
- Detailed product pages with **origin, pricing, certifications, badges, and trust indicators**
- **Shopping cart and secure checkout** with multiple domestic & international payment options
- **Multi-region and multi-currency system** with automatic price conversion but should be higher than India
- **Customer and Distributor login portals** with role-based access

## Distributor / Reseller Application & Management

- “**Become a Distributor**” application with online form submission
- Form fields to include: Name, Address, ID Proof, PAN, GST Number
- **Location capture using Google Maps** (auto-fetch coordinates, pincode, and location link)
- Dropdown selection for **Reseller / Distributor / Official Gilaf Store**
- All applications stored securely in the **database** with status: **Pending / Approved / Rejected**
- **Admin approval workflow** to approve or reject applications
- Admin ability to **export application data to Excel** (approved, rejected, pending)
- **Admin portal access** to manually create, edit, or delete distributors/resellers
- All admin-created and user-submitted records stored in the same database
- Approved distributors/stores automatically available in **pincode-based store locator** for customers
- **Order tracking system** it should be manually or free api based changing the status
- **Product authenticity verification** using Batch ID (farm-to-customer transparency)  
it should be showing the data which is stored in db from backend by manually

entering the details I can provide you the same for that

When user will enter the batch Details

- **Result >>**

Product Name

Net Weight

Manufacturing Date

Expiry Date

Country of Origin

### **Lab Report Management**

- Lab report feature enabled **only for products with available lab reports**
- **Admin-controlled toggle** to enable or disable lab report option per product
- It should show attach lab report error if **not attached the lab report**

Date And Time

---

- **Store & distributor locator** with pin code-based search and directions
- Integration of **domestic and international logistics partners manually or free api through**
- Complete **legal & compliance pages** (Privacy, Terms, Shipping, Refund, Payment policies)
- Scalable architecture ready for **admin dashboard, inventory management, CRM, and marketing automation**

**Outcome:** A secure, scalable, and high-conversion eCommerce platform positioning **Gilaf Foods & Spices** as a **premium global heritage food brand.**

I will attach my sample or Template website

1: user website template attached in ref

2: Admin side website attached for generating Batch Number Automatically

Dummy Batch number for Test>>GF-2025-01

Dummy Pin Code for Testing >>190001
